## Who are these people?

---

The band Manning has been around since 1999, formed around the prodigiously talented singer / songwriter / multi-instrumentalist **Guy Manning**. Having previously been an associate of prog legends Parallel or 90 Degrees and being a founder member of the internationally respected, The Tangent, Guy has an impressive record of releasing ten studio albums in ten years!

*"Manning produce an eclectic mix of music which broadly falls within the "progressive" genre, but in reality spans many different musical forms from beautiful ballads and folk-tinged songs through to awesome all-out rock workouts and true progressive epics – no two songs sound the same!"*

The band is currently experiencing a surge of interest and support, with the previous album "Songs From The Bilston House" having been nominated for Album of the Year by the Classic Rock Society (CRS) and a series of storming headline gigs in support of the latest and critically acclaimed album "Number Ten".

Highlights of the band's tenth anniversary year will be an appearance at the 2009 Cambridge Rock Festival and the planned recording of a live album later in the year.

2010 is shaping up to be a milestone breakthrough year for this remarkable band!
